Water resources data were generated by the Philadelphia Water Department as part of a source water protection plan for the Schuylkill River Watershed.

Headwaters-Headwater streams are order 1 stream segments with a 200 foot buffer, isolated from the USGS NHD data set.

Reservoir Watersheds-Reservoir watershed boundaries were manually delineated using USGS topography data.

Exceptional Value Streams-The PA Department of Environmental Protection has designated exceptional value streams throughout the state.

Cold Water Fisheries-All PA Department of Environmental Protection designated cold water fisheries are included with a 100 foot buffer.
